Mastering GeoNode installation and configuration (GN3)

DURATION: 8 hours (2 sessions)

LEVEL: Advanced

TRAINER: Alessio Fabiani

The training aims to provide those wishing to build a spatial data infrastructure using GeoNode an in depth look into advanced installation, configuration and operation. Topics covered are as follows:

- GeoNode installation options, including:
  - core Vs project
  - docker, SPC
- Customizing look and feel
- Advanced GeoNode configuration, including:
  - monitoring and analytics
  - LDAP connection
- Advanced GeoNode Administration
- Hardening GeoNode

PREREQUISITES

In order to participate basic knowledge of GeoNode is required as well as having a basic knowledge of GIS concepts and metadata standards.

ACCOMPLISHMENTS

At the end of the training will be able to master the installation and configuration of GeoNode as well as its operation in production.

OTHER INFORMATION

GeoSolutions will make available an all-in-one package to run the workshop as a VM for VirtualBox. This should be pre-installed on attendees laptops before the workshop.

This is a **advanced** training, at least GN1 module is recommended as a precondition.
