Getting started with GeoNode (GN1)

DURATION: 8 hours (2 sessions)

LEVEL: Novice

TRAINER: Alessio Fabiani

The training aims to provide those wishing to build a spatial data infrastructure an overview of the GeoNode capabilities to get started. Topics covered are as follows:

- GeoNode basic concepts
- Quick installation guide
- Using GeoNode
  - Uploading and managing layers
  - Uploading and managing documents
  - Uploading and managing maps
  - Creating GeoStories
  - Creating Dashboards
- Introduction to configuring GeoNode
- Introduction to administering GeoNode

PREREQUISITES

In order to participate, no previous knowledge of GeoNode is required but having a basic knowledge of GIS concepts and metadata standards will be of great help.

ACCOMPLISHMENTS

At the end of the training will be able to perform a basic installation and configuration of GeoNode, load, configure and style shapefiles and geotiff and create maps with them.

OTHER INFORMATION

GeoSolutions will make available an all-in-one package to run the workshop as a VM for VirtualBox. This should be pre-installed on attendees laptops before the workshop.

This is a **novice** training, no other modules are recommended as a precondition.
