

Behaviour Management: Attachment and Trauma

Facilitated by Julia Summers, Headteacher
at Holy Trinity Newark

This training will give Midday Supervisors information to help them better understanding and support pupils with a variety of complex and challenging behavioural needs.

By the end of the 2 sessions all learners will have:

- An understanding about Attachment and Trauma that impact a child's behaviour.
- Examined behaviour as communication.
- Examined Adverse Childhood Experiences.
- An understanding on the human response.
- An understanding of strategies and an approach to support you.

You can book all your midday supervisors onto this course. Your team may benefit from attending this training in one location if that is possible. We'd recommend that a Senior Midday Supervisor or member of the school team also attends the course to support the delegates during the training.
