# Military Medic to EMT
## Online Hybrid

## COURSE OVERVIEW

IMMERSIVE · HANDS-ON · INSTRUCTOR LED · ONLINE

## COURSE DESCRIPTION:

NAR Training's Military Medic to EMT (MM2EMT) Initial Course is designed to streamline the process for currently qualified military medics to become eligible to obtain a state or NREMT Emergency Medical Technician (EMT) certification. Overall, the course has the same educational standards and requirements as our EMT course offered to civilians but with a very specific focus on the military healthcare provider/medic. There are many parallels in the knowledge, skills, and abilities found in the military medic clinical career fields when they are compared to the standards required to be eligible for certification as an emergency medical technician. The MM2EMT course is conducted with a blend of online didactic education with 24/7 accessibility and fulfillment of laboratory, clinical, and field training requirements at one of our Training Centers.

*Military healthcare providers who are active duty, reserve or guard status would be eligible to participate in this program.

**LEFT:** Combat Medics in a NAR Training Scenario Using an Actor with Fake Wounds Applied
**RIGHT:** Military Medic Transitioning Their Skills to the Civilian Sector through an EMT Certification

### INTENDED AUDIENCE:
