

East Midlands East Maths Hub

Creating Passionate and Outstanding Mathematicians

Aggregating Marginal Gains through Action Research

Purpose

"If you always do what you've always done, you'll always get what you've always got." (Henry Ford)

We are seeking to create a series of practitioner-led action research projects that support teachers in improving their work in mathematics education. In particular we want to assist children in reaching their potential through developing fluency, reasoning and problem solving skills.

These action research projects will produce CPD, teaching resources and activities that will form a bank of material which the educational community can draw upon and develop.

Applicants should consider areas of research that they would like to work on, but these will be finalised and developed at the initial training day. After the first workshop participants will have developed clear research questions and an action plan for investigating.

Programme

Full training and support will be given on an on-going basis throughout the year. The key dates for attendance at The Minster School are:

Wednesday 18th October 2017

Monday 29th January 2018

Monday 21st May 2018

Friday 6th July 2018 - Primary Conference (to be held at Nottingham Trent University)

Participants

This programme is open to all teachers in any phase of education. We would also welcome applications from multiple teachers from the same school.

Providers

Dr Andrew Clapham - Nottingham, Trent University

No charge

(subsidised by the Maths Hub)

When contacting us to book please provide the following information:

- Your school
- Year group taught
- Potential area of interest (if possible)
