

# Designing Lessons: Depth of Learning for All

## Primary Teaching for Mastery

**OVERVIEW:** Refining understanding of good lesson design, and being able to use resources well, is a crucial element in developing teaching for mastery. Teachers in this Work Group will work together to plan exemplar lessons (drawing on new Mastery Professional Development materials produced by NCETM/Maths Hubs and other sources of mastery resources for the classroom including textbooks) and in so doing will improve lesson design across their school. The project will also make use of the planning guidance created in previous projects to update and extend it, and it will be informed by the work of the 'Planning Opportunities for Greater Depth' project in 2017/18 and 2018/19.

### WHO IS IT FOR?

**Schools that have made a significant commitment to Teaching for Mastery in their curriculum planning are invited to nominate two teachers for the Work Group.** One of these should be in a middle or senior leadership role (ideally the Maths Lead) with experience and expertise in teaching for mastery. It will also be suitable for schools that have taken up textbook match funding and are looking for support with good use of the new resources.

### WHAT IS INVOLVED?

- One day per term meeting with all the other schools in your Work Group.
- One further day per term, meeting with two teachers from another school in the Work Group to enable joint planning and observation of each other's lessons, with a focus particularly on the small steps required in teaching for mastery.

### INTENDED OUTCOMES

- Participants should gain a deep understanding of the elements of effective lesson design and how the big ideas of mastery influence this, particularly with regard to small steps of learning.
- They will be able to make good decisions about what to include or leave out, and when to supplement the materials with their own.
- Teachers are expected to share their learning with others teaching maths in their school, and use this to influence the whole school's maths lesson planning.
- The impact of small steps lesson planning and learning will be seen by progress shown in children's books.

### THE WIDER CONTEXT

The Maths Hubs network, across England, works on national projects by running local collaborative Work Groups of teachers around national maths education priority areas. One such priority is to embed maths teaching for mastery across primary schools. Significant national funding has been committed to resourcing this development with textbooks and the NCETM professional development materials. This national project exists to support effective use of these emergent teaching for mastery resources in lesson planning. It builds on the work of the 2017/18 project using planning guidance developed by this project.

Work Groups use a common evaluation process, which collectively provides a body of evidence on the project's outcomes. So, your participation in this Work Group will contribute to your own professional learning, and that of your school colleagues, as well as contributing to the improvement of maths education at a national level.

## EXPECTATIONS OF PARTICIPANTS AND THEIR SCHOOLS

It is imperative that participants attend **all** of the workshops and complete all gap tasks and activities to ensure that the Work Group has maximum impact. Participants schools are required to support participants by enabling release time for them to attend.

Each pair of colleagues from a school will work with a pair from another school to design, deliver, observe and evaluate lessons as well as discussing progress and actions with the Work Group Lead. Participants will be expected to offer their feedback on the Mastery Professional Development Materials as well as the lessons that they collaboratively design.

Schools will be expected to release two participants for the days required and to support them in providing time for collaborative work with the in-school and partner school colleagues. It is expected that participating schools will be committed to embedding Teaching for Mastery in their curriculum and will be able to benefit from the participation of their teachers in this Work Group.

### WHO IS LEADING THE WORK GROUPS

The Work Groups will be run by:

Phillippa Johnson - Bourne Westfield Primary Academy, Work Group Lead

Ben Stanley - Mansfield Primary Academy, Work Group Lead

#### NOTTINGHAMSHIRE VENUE

##### The Minster School

Nottingham Road  
Southwell, Nottinghamshire, NG25 0LG

##### DATES

Friday 11th October 2019, 9.30am to 3.30pm  
Wednesday 29th January 2020, 9.30am to 3.30pm  
Wednesday 10th June 2020, 9.30am to 3.30pm

#### LINCOLNSHIRE VENUE

##### Bourne Westfield Primary Academy

Westbourne Park  
Bourne, Lincolnshire, PE10 9QS

##### DATES

Wednesday 9th October 2019, 9.30am to 3.30pm  
Wednesday 29th January 2020, 9.30am to 3.30pm  
Wednesday 10th June 2020, 9.30am to 3.30pm

## FUNDING

The programme will be fully funded through the East Midlands East Maths Hub, however there will be a £15 per session fee for non-attendance to cover costs.

## IF I'M INTERESTED, WHAT NEXT?

To reserve your place, please use the link below to our online booking system. For further information, please contact Julie Naidu, Maths Hub Coordinator, [enquiries@ememathshub.org](mailto:enquiries@ememathshub.org), tel: 01636 817 377.
